

2025 Alaska Community Health Centers Report

Caring for Alaskans in Their Communities

Improving Lives & Saving Money.

Alaska's Federally Qualified Health Centers (FQHCs), (also known as Community Health Centers or CHCs), provide tremendous value and impact for our state. These community-based clinics help patients achieve wellness and productive lives. At the same time, Community Health Centers generate savings for the healthcare system, all while growing employment and stability in their communities.

Community Health Centers care for 1 in 6 Alaskans in over 200 clinic sites with high quality, comprehensive primary care. Serving everyone regardless of their insurance coverage, CHCs are an important part of the community safety net. For example, as the senior population grows in Alaska, CHCs are finding innovative ways to care for aging Alaskans in their home communities. And because access is key to health care, most Health Centers are in rural and frontier Alaska communities where they are leading in integrated behavioral healthcare, expanding mobile and community-based services, and growing Alaska's future healthcare workforce.

In 2025, we are focused on three priorities:

- **Payment** - ensuring that Community Health Centers are accurately and rightfully paid for the services that they provide to patients.
- **Workforce** - developing, recruiting, and retaining the clinical providers and other staff needed to provide the high-quality care Alaskans deserve.
- **Access** - assuring that anyone needing care can get it in their community.

For 30 years, the Alaska Primary Care Association, (APCA) and Alaska's 29 Community Health Centers have devoted themselves to ensuring all Alaskans can get good care where they live. We are committed to sustainable, high-quality, and comprehensive primary care.

Leadership

- **Nancy Merriman**, Chief Executive Officer of Alaska Primary Care Association
- **Joshua Gilmore**, APCA Board Chair and Chief Executive Officer of Sunshine Community Health Center

Alaska Primary Care Association

All data shared in this report is collected by the HRSA Uniform Data System (UDS) for Alaska Health Centers for calendar year 2023. Includes two FQHC Look-Alikes that do not receive HRSA-based grants. Employee data is calculated by full-time equivalent employees.

- **Total Patients:** 112,659
- **Total Employees:** 2,691
- **Community Health Centers:** 29
- **Tribally Operated CHCs:** 15
- **Non-Tribally Operated CHCs:** 14
- **Permanent Sites:** 197
- **School-Based Sites:** 8
- **Mobile Clinics:** 8
- **Other Clinic Types:** 5
